

EuPA bulletin, Issue 1, October 2009

We are happy to announce the first issue of the EuPA bulletin, the official newsletter of the European Proteomics Association. A bi-monthly online publication edited by the EuPA Conference and Communication Committee. Through short articles it aims at being the vehicle for the dissemination of the EuPA and the different Proteomics National Society activities and initiatives, its committees, and representatives. It also expects to be a forum for discussion and ideas exchange on all areas of proteomics. It may contain information on "who is who in proteomics" (research groups, scientists), books, papers, databases, and announcements of meetings, courses, thesis and job offers.

We hope you will enjoy the reading!
